The course presents a variety of methods for finding the right remedy based on ailments and symptoms, specific organs, and the needs of particular occupations. The course features remedies and instructions for nearly two hundred illnesses, injuries, physical conditions, and health care needs, including: headaches, colds, arthritis, food poisoning, insomnia, pregnancy and birth flu, antibiotic-resistant infections and epidemics, wounds and scars.

Health Improvement-Herbal Lifestyles

3 Credit Hours

When tragedy strikes and you are unable to access doctors, pharmacies, and hospitals do you have a back-up plan. Natural medicine is increasing in popularity, and this guidebook will show you how to craft natural medicine for emergencies, first aid and everyday ailments. You will learn therapeutic properties of over fifty herbs to create powerful home remedies, that will be a smart survival tool in the hand of the craftsman.

Microbiology**2 Credit Hours**

A comprehensive yet concise study on Microbiology that leads you from the history and scope of microbiology, through the equipment and techniques used, and survey of microorganisms such as eukaryotic cells, and bacteria. You will also discover control of microbial growth, transport of molecules, and microbial metabolism.

Detoxification**3 Credit Hours**

Many Americans are toxic. Most follow the world's worse diet. A body with a healthy immune system, efficient organs of elimination and detoxification, and sound circulatory and nervous system can handle a great deal of toxicity. In this study you will learn the benefit and the importance of how to cleanse the body of toxins. Toxic suppressors can include heavy metals (lead, aluminum, cadmium, copper, mercury, arsenic, nickel), chemicals (carcinogens, fluoride, chlorine, food additives), and radiation (electromagnetic, microwave, nuclear, solar X rays, computer monitors). They can all include ingested hormones, steroids, drugs, alcohol, toxic water, caffeine, processed foods, inhaled or absorbed pesticides perfume, smog, nicotine from cigarettes, noise, and stress. The toxic suppressors must be eliminated before medications and other natural approaches will have permanent effect.

Homeopathy for Children**3 Credit Hours**

This course targets children and their specific needs. The textbook is written by Dr. Henrietta Wells, a British homeopath. She delves into the history and use of homeopathy, the advantages, common criticisms, how to mix homeopathy and allopathic medicines, and explains how remedies are made. Also, Dr. Wells lists rules for dosage, potencies, and repetition of doses. Interestingly, she includes thoughts on First Aid and Acute Diseases. Moreover, other sections include the best way to treat common acute childhood ailments and diseases. Lastly, she explains how to use the Materia Medica and what remedies to use for various diseases. Most importantly, she gives a list of companies for the homeopathy to contact to purchase the best homeopathic products.

Homeopathy-Major Animal Remedies*3 Credit Hours**

This course is an introduction to homeopathy with the focus on dogs and cats. You will learn the history of homeopathy, the nature of disease, and the basics of applied homeopathy. You will also learn how to use homeopathy with a variety of ailments. The author of the text also has an entire section focused on vaccinations and how they contribute to the declining health in our pet population. You will also learn about the descriptions of homeopathic medicines. Homeopathy is a fine art with much study and practice involved but this course will provide you with a basic understanding and application for acute care.

Mental Conditions and Nutritional Therapy**2 Credit Hours**

Mental Disease is the second leading cause of disability and premature mortality in America and other developed countries. Some years ago schizophrenia was the most commonly diagnosed mental Disorder, but now it is Bipolar Disorder.
